Remi Mesh

Remi Mesh is a task chair fitted with a stylish and breathable mesh back. The back is ergonomically shaped, height adjustable and delivers comfort throughout the day. Remi brings a contemporary feel to every office environment.

Code: REP-MSHBLK-B-AA

Remi Upholstered

Design features such as the contoured foam seat and back, adjustable arms, mechanism options and a standard high back make Remi the ultimate task chair, suitable for every office and every pocket.

Code: REP2-B

Arms code: AA

Aria

Aria is a stylish task chair made using a large proportion of recycled and recyclable materials. The comfortable mesh backrest with an easy to adjust height mechanism allows for a simple comfortable seating position in seconds.

Code: AR-MSH-BLK-A3A

Finn

The Finn wire frame chair is a very stackable, multifunctional chair with a plastic seat and back.

The material is composed of at least 95% recycled polypropylene without additives.

Optional are the plastic armrests (anthracite) or wooden armrests (clear lacquered or stained).

Chair 400

Designed in the sixties, chair 400 has a long history. This chair exudes nostalgia, but is entirely of this time. It has stood the test of time, since its design in the sixties.

Please note: all chairs with beech seat & back come clear lacquered as standard

Felt. A colour for every project

Our felt range of chairs can be mixed and matched with a variety of colours to make your space really pop.

Felt Fine, Felt High and Felt Relax

Felt Fine

This slender stackable chair is based on the design of the Felt chair. The tubular frame closely follows the organically shaped felt seat shell part. This is not only beautiful to look at, it also allows a compact stacking of the chairs.

The design of the seat is comfortable in material and seat contour. The Felt Fine is part of the sustainable Felt family.

Felt Medium and Felt High

Gentle lines and clean contours

The felt-like material beautifully highlights the use of gentle lines and clean contours. The felt seat is supported by 2 different frames: A slender tubular frame of 16 mm and a wooden frame.

Both versions have
a 12 mm footrest
connecting the legs
at the bottom.

Hemp Fine

With the Hemp Fine we are the first in the world to launch a collection of chairs with a shell of a unique biomaterial. The used materials hemp and resin are both fully biological, plant-based and recyclable. Something that has never been possible before.

With seating pad

With arms, no seating pad

With arms and seating pad

Hemp Medium and High

We have repeatedly expressed our ambition to make nothing but sustainable circular furniture in the future and a 100% biological chair fits in perfectly with this vision. Using the beautiful, natural material hemp and Plantics bio-resin, this turned out to be possible, resulting in Hemp High and Hemp Fine.

Ottoman

With four sizes and a variety of fabrics and colour options, this Ottomon is ideal for an informal workspace or education environment. The fully upholstered stool features glides for easy mobility.

Modular Armchair (also known as Worksphere)

- fully upholstered
- sleek armrest
- low back and deep seat for relaxed, casual sitting
- available as corner element, armchair, two- and three-seater sofa
- armrests available in both left and right versions for two- and three-seat versions
- black legs as standard

Modular Sofa

Modular Sofa (also known as Worksphere) blends practical and technical functionality with style and comfort. The range enables you to relax how and when you want and provides flexibility within the workplace.

WorkspHERE Scatter Cushion

Code: WS-CUSH

Bila Table

With Bila laptop table, a handy mini-workspace can be created in no time – and in any place

Code: Bila

This laptop table is equipped with castors so it can be easily rolled

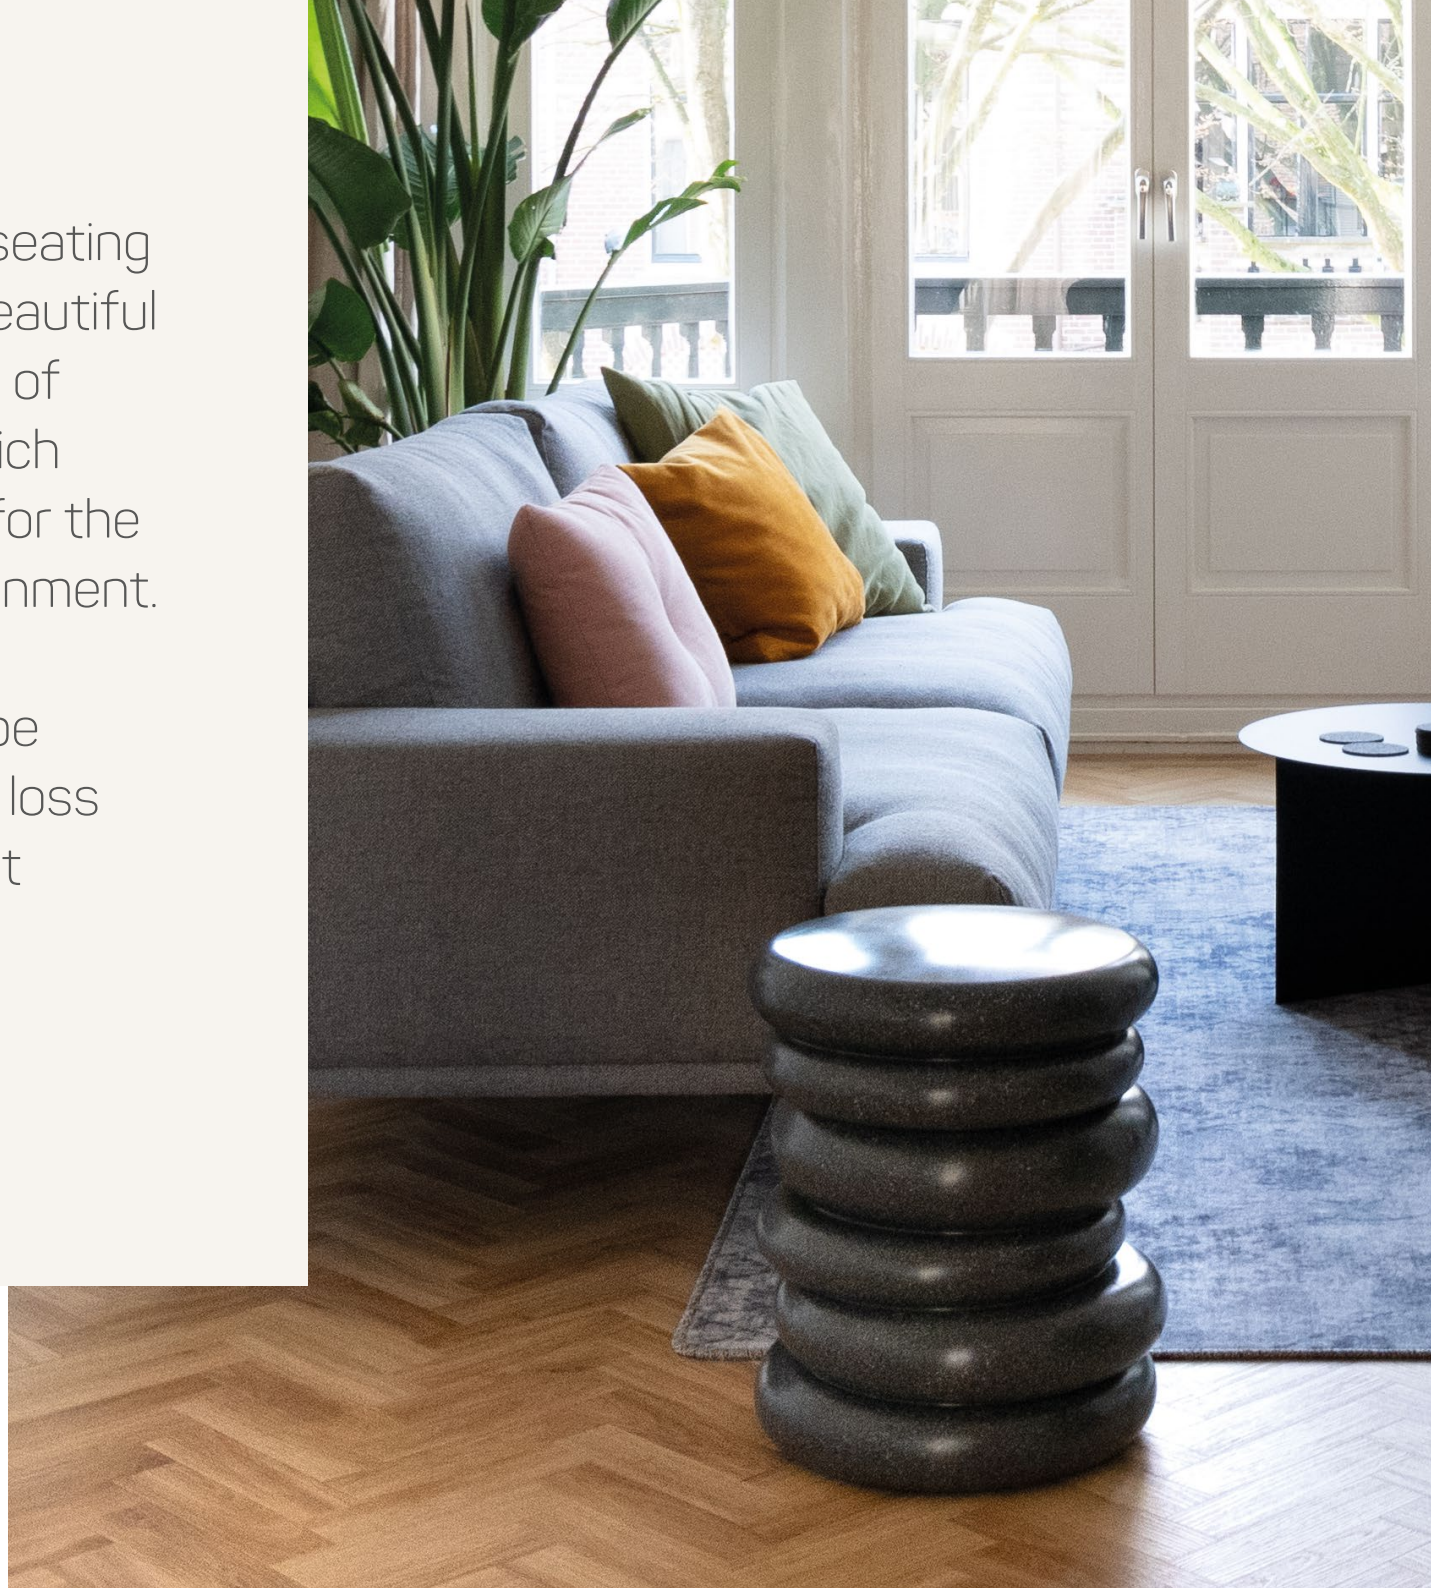

Wybelt

The Wybelt is a beautiful seating element with an equally beautiful story. The Wybelt is made of post consumer plastic which means zero waste. Great for the office, great for the environment.

The seating element can be recycled infinitely without loss of quality and this makes it 100% circular.
